

Dispatching Made Easy

MobileDispatch

From job creation to tracking, do it all in from dispatching solution.

Dispatch, track and monitor pickup and delivery status on jobs through the Mobile Dispatch App. Drivers can easily download it through SMS and login to their app with their mobile phone number avoiding complicated setup and training.

Drivers are notified on new jobs and can update status and proof of delivery through the app. When drivers complete the job, a notification is sent with arrival time, signature, photos, and pickup to arrival route breadcrumb.

- ✔ Track drivers from mobile phones
- ✔ View activity on a map, all statuses, and even receive job progress notifications
- ✔ Allow workers to set schedules for mileage or location
- ✔ Log trips as business or personal for tax and business mileage logging purposes

Real-Time Tracking

Dispatch, track and monitor job status with the app

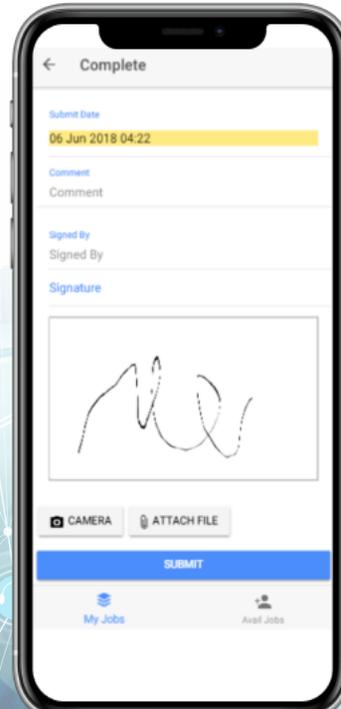

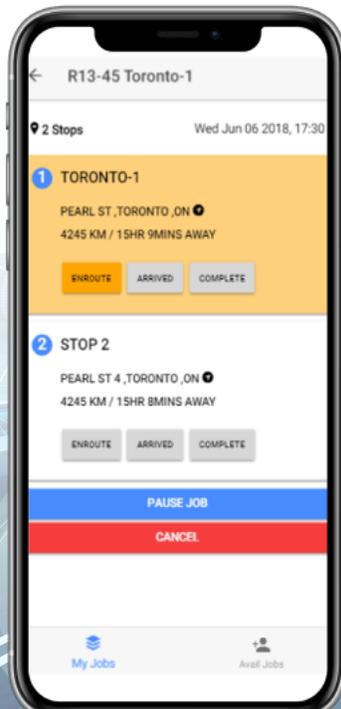

Easily Assign Jobs

Notify drivers of new jobs available through the app

Progress Notifications

Display arrival route, time, signature, and photos for routes

Making Dispatching Easy, Organized And Efficient.

How MobileDispatch Works

Step 1 - Assign The Job

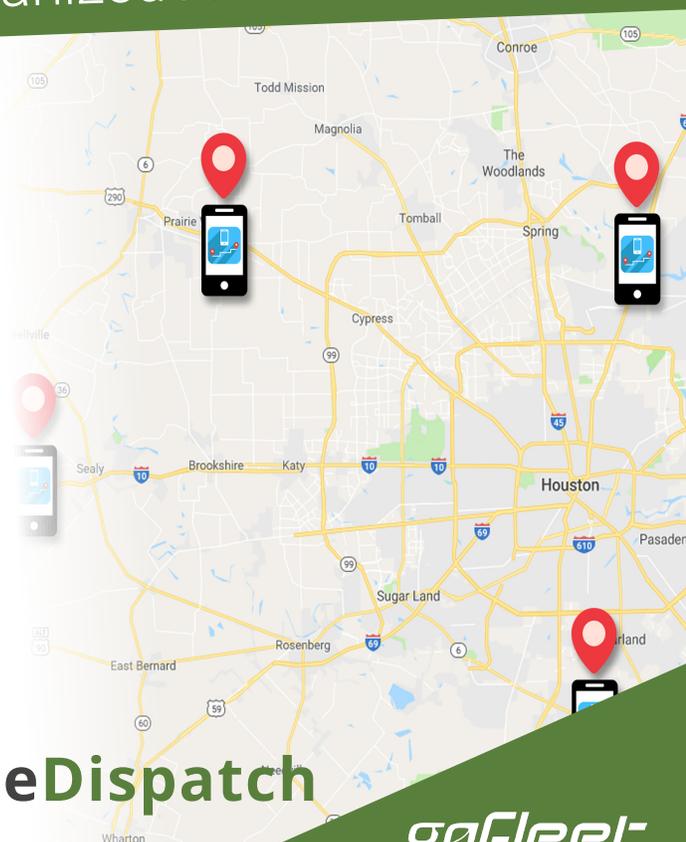

Assign a job to a driver if they are close to the delivery location or if they have availability to complete an order

Step 2 - Track Your Driver

Track and check the status of the delivery to update customers accordingly

Step 3 - Delivery Alerts

Receive a notification when a job is completed with arrival route and time
