

Sat Trax Iridium

Satellite Vehicle Tracking

Is your organization looking for reliable 24/7 communication for your fleets? GoFleet offers Iridium satellite GPS vehicle tracking solutions. The Iridium modem has been integrated with GO7 device as a backup means of communication. The GO7 will use the cellular network as its primary means of communication, but in the event that the device can no longer communicate via GSM or CDMA, the GO7 device will send positional updates via the Iridium network. This in turn provides reliable and cost effective solutions to your organization.

FEATURES

Ignition Notification

Sends a log when the ignition state changes (on and off).

Location Updates

Users have the option to request the current location of the device; the regular update period is every 30 minutes.

BENEFITS

Emergency Trigger/Button

Allows drivers to send an immediate emergency/distress message to head office; the device will notify the driver when the message has been received.

Accident Upload Via Iridium

Allows the device to send an 'Accident Upload Event' fault.
