

Truckmate Geotab Drive Integration

Sync Customers | Driver Work Forms | TM Work Order Updates

Solution Overview

TruckMate is widely used for Full Accounting, Integrated Dispatch and Operations Software for mid-large LTL, Intermodal and Truckload carriers.

By combining the power of TruckMate with MyGeotab and Geotab Drive, drivers are now able to updates work orders and work order status directly from their Geotab Drive Compliance App. Other features include driver arrival prompt, customer sync, HOS hours remaining, and much more...

Core Features

Real Time WO Updates

Get real time updates on work order within Truckmate based on arrival at customer zones and/or work order form completion.

Driver Arrival Prompt

Drivers are prompted to complete work orders upon arrival at a customer location.

Value Added Benefits

Reduced Costs

Reduced transportation costs due to better route planning and dispatching; generate ROI in months, not years.

Streamline and Improve Service

Dispatchers are more responsive to customer demands and updates. Faster updates allow businesses to invoice and get paid faster.
