

Indoor Tracking With No Upfront Hardware Cost

Trax Indoor

Quickly track, locate and gather data on asset utilization.

Trax Indoor is an asset tracking solution that provides users advanced visibility of moving assets indoors, and works in line with outdoor solutions. Visually, assets will be shown on custom maps that provides utilization data and customizable alerts on almost anything.

Trax indoor is typically used by businesses in healthcare, manufacturing, warehousing and distribution, and retail. Through the Trax platform customers purchase readers and beacons specific to their tracking needs for just a monthly recurring fee.

- ✔ Tracks up to 50 meters
- ✔ Able to read up to 500 beacons at once with a 15 second display and default refresh rate
- ✔ Works in line with outdoor tracking solutions

Complete Visibility

Track and locate assets efficiently on maps specific to buildings

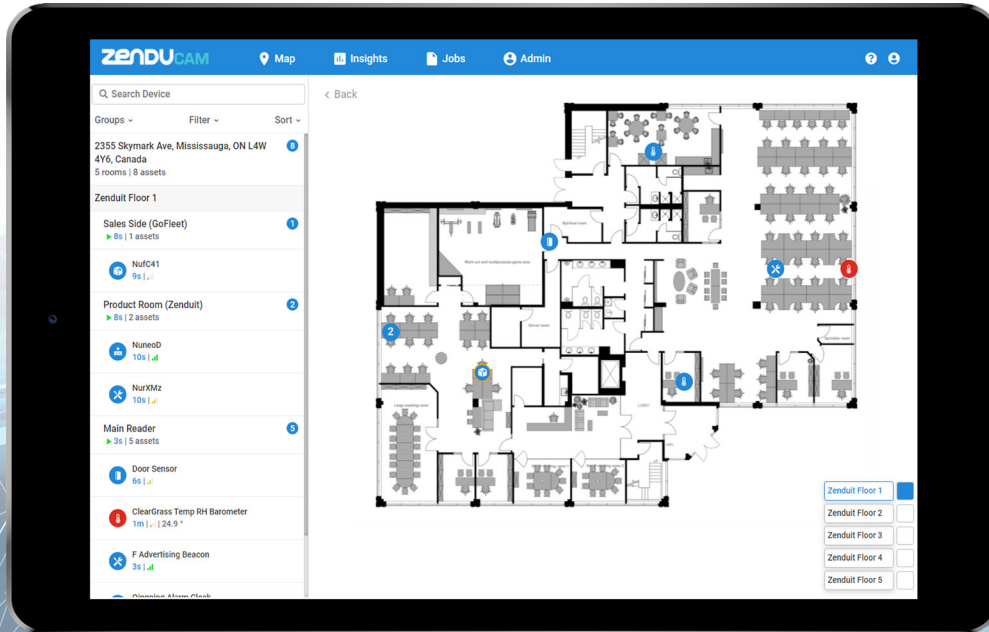

Improve Utilization

Track and monitor the utilization of assets with the ability to set alerts

Advanced Reporting

Record data on door open/close, temperature and more

Total Indoor Tracking With One System

Leverage Trax For All Your Tracking

Upload custom floor plans of buildings into Trax that associates with worksite addresses as well as Mac ID's of beacons and readers.

Place Devices Accordingly To Collect Data

Set readers within rooms where assets need to be tracked and drag and drop the location of the reader on the uploaded floor plan. Place beacons on important assets to follow location movement in real-time.

Configurable Rules

Monitor location movement history as well as set rules and alerts to notify users by email to SMS of movement, door sensors as well as temperatures.

Location Beacon

Gateway Reader

Temperature Beacon
