## Trax Indoor

Real-Time Asset and Material  
Tracking Solution

**TRAXINDOOR**

## OVERVIEW

Visibility of asset location in real-time is essential for organizations to gain better insights into the movement of critical assets throughout their facility while enabling them to make proactive decisions that increase the efficiency of their operations.

**ZenduiT's Trax Indoor** is an intelligent indoor tracking and positioning solution that leverages a suite of ZenduiT's proprietary BLE asset tracking technology with BLE beacon. It provides an advanced and accurate real-time indoor location and positioning experience for organizations within 50 cm accuracy.

### SUPERIOR ACCURACY & RELIABILITY

Real-time indoor positioning helps organizations locate assets with accuracy

### MAINTENANCE-FREE & HIGHLY SCALABLE INFRASTRUCTURE

Unique maintenance-free hardware with high scalability & battery conservation

### IMMERSIVE TRACKING EXPERIENCE

Utilises precise floor map information (within 50 cm accuracy)

### MINIMAL INFRASTRUCTURE REQUIREMENTS

Ensure wider coverage with minimal infrastructure - and investment

## FEATURE HIGHLIGHTS

### Superior Accuracy for a Real-time View of Assets

**Trax Indoor** enables organizations to achieve real-time indoor visibility, helping them locate assets and workforce with an accuracy radius of around two meters and without latency. Visibility of asset location empowers the organization to proactively plan their schedules, eliminate bottlenecks and streamline workflows.

### Safe & Dynamic Operations

With **Trax Indoor**, organizations can have a real-time overview of all registered assets and workforce on the floor map dashboard. Monitoring the status, key alerts and positioning of resources within the facility empowers organizations to respond quickly in the event of an emergency or dynamic operational requirements.

## FEATURE HIGHLIGHTS

### Simple Scalability and Maintenance-free Sensor Infrastructure

Our solution leverages robust, maintenance-free sensor infrastructure that optimizes the operational life of the solution and of its battery. Sensors come with built-in telemetry and monitoring capabilities, which enable organizations to remotely monitor the key positioning and temperature details of their respective facilities

### Advanced Reporting of Historical Movements

Trax Indoor automatically records the movement of assets across the floor plan, along with the time spent in the area, while seamlessly recording motion data. Changes in motion data over time are also recorded and can be reviewed to determine previous movement or placement. Corresponding alerts and notifications can be set to notify when an asset enters or leaves a room or zone

## FEATURE HIGHLIGHTS

MS H4P Beacon

MS Indoor 107

MS Indoor 110

MS M2 Beacon

## DYNAMIC INTEGRATION

**zenduCAM**

Easily view road and driver-facing footage in real-time through the ZenduCAM secure dashboard using either the desktop or mobile application

Apply ZenduCAM predefined rules to trigger and analyze critical events

Use the ZenduCAM rewind feature to investigate previous incidents or search for a specific event

Take advantage of ZenduCAM's unlimited cloud storage to record uninterrupted events from the dash camera
