

Telematics Platform

Trusted and Advanced Telematics Platform for Efficient Fleet Management

Designed to provide your business with a comprehensive solution to increase efficiency, improve safety and streamline productivity. With built-in accuracy and real-time data insights into your fleet location, status, and performance, you can make informed decisions that optimize your overall fleet operations.

Optimizing your fleet performance is crucial for staying ahead in today's fast-paced business landscape. There are a lot of challenges and inefficiencies that need to be addressed to manage your fleet more efficiently than ever. From reducing risky driving behaviors including speeding, acceleration, and harsh breaking, to reducing fuel consumption, minimizing idle time, and increasing field productivity

Enabling your organization to improve overall visibility and utilization and data-driven insights to make informed decisions to ensure compliance across your entire operations.

Benefits

Improve Safety

Driver Behavior, Distracted Driving, Seat-belt alerts, Incab coaching, and more.

Increase Efficiency

Route Optimization, Workforce Management

Streamline Productivity

Geofencing, Jobs Management, Dispatching, and backoffice integrations

Reduce Cost and Increase Savings

Fuel consumption, Insurance discounts, reduced over time, etc.

One Tool. Many Applications

Meet the suite of Solutions for your every unique business needs

Winter Operations Management

- Winter maintenance vehicle tracking and optimization
- Automated reporting for regulatory compliance and billing
- Accident and violations detection with real-time notifications
- Real-time reporting on salt usage and road conditions

Work Management

- Dynamic Work Order Management
- Custom Integrations to Integrate your Work Orders
- Detailed reporting & insights on work • orders
- Real-time visibility & control of orders

Maintenance Work Order Management

- Real-time Vehicle Diagnostics
- Automatically capture asset and fleet parameters from vehicle ECM
- Prioritize planned and unplanned • maintenance task based on dynamic needs

Indoor and Outdoor Asset Tracking

- Scalable and Maintenance-free Sensor Infrastructure
- Comprehensive solution for remote and realtime visibility of assets
- Custom reports and dashboards for effortless decision making
- Cloud-Based Temperature Monitoring Solution
